PROFESSIONAL SUMMARY

Microsoft Certified Power Platform Developer Associate (PL-400) and .NET Solutions Engineer with over four years of experience architecting and delivering enterprise solutions. Specializing in Power Apps (Canvas & Model-Driven), Power Automate, Microsoft Dataverse, and Dynamics 365 CRM. Strong complementary expertise in full-stack .NET development (React.js, .NET Web API), SharePoint migrations, and SQL Server, enabling robust business process automation and the delivery of secure, scalable, end-to-end applications.

TECHNICAL SKILLS

Power Platform & CRM: Microsoft Power Apps (Canvas & Model-Driven), Power Automate, Microsoft Dataverse, Power Pages, Microsoft Dynamics 365 CRM

.NET : C#, ASP.NET MVC, .NET Web API, Entity Framework, REST APIs

SharePoint & Collaboration: SharePoint Online, SharePoint Server 2019

Web Tech & Databases: React.js, JavaScript, HTML5, CSS3, Microsoft SQL Server

PROFESSIONAL EXPERIENCE

SharePoint & .NET Solutions Engineer *Sep 2025 – Present*

Allied Bank Limited (Head Office) *Lahore, PK*

- Collaborate with the SharePoint migration team to provide dedicated development and technical support, performing environment analysis, troubleshooting complex migration issues, and validating migrated content (SharePoint 2013 to 2019).
- Provide ongoing enterprise SharePoint administration, production support, and maintenance, resolving production-related issues and ensuring high availability.
- Lead the development and implementation of core banking solutions including the Product Knowledge Measurement Portal (PKMP) and Branch Service Health Check applications.

Microsoft Power Platform & .NET Solutions Engineer *Apr 2022 – Aug 2025*

Stewart Pakistan (Pvt.) Ltd *Lahore, PK*

- Managed SharePoint Online administration, customization, and user support.
- Automated complex business workflows using Power Automate, integrating with SharePoint and SQL Server.
- Developed robust Canvas and Model-Driven applications connected to Dataverse and SharePoint.
- Managed SQL Server databases and optimized backend data access utilizing ADO.NET and Entity Framework for high-performance .NET applications.

KEY PROJECTS

Hospital Management System (Portfolio) — Microsoft Power Platform

- Developed a modern, modular Hospital Management System using Microsoft Power Apps to streamline healthcare facility operations.
- Automated operational workflows using Power Automate and implemented secure, role-based access controls via Microsoft Dataverse.

Concierge Portal — Microsoft Power Platform

- Developed a Power Apps-based employee service portal to automate service requests, approval workflows, and tracking using Power Automate and SharePoint.

Product Knowledge Measurement Portal (PKMP) — Allied Bank

- Designed and developed an end-to-end web application using React.js, .NET Web API, and SQL Server.
- Served as Solution Architect, directing solution architecture, database design, API development, fronted integration, and overall deployment.

Branch Service Health Check & SharePoint Migration — Allied Bank

- Developing a dynamic web application utilizing React.js and .NET Web API to monitor banking branch service metrics.
